

Source Bloomberg Commodity Ex-Agriculture UCITS ETF

Investment objective

The Source Bloomberg Commodity Ex-Agriculture UCITS ETF (the "Fund") aims to provide the performance of the Bloomberg Commodity Ex-Agriculture and Livestock 20/30 Capped TR Index (the "Reference Index").

Investment risks

- Commodity prices can be volatile
- The performance of commodity indices may differ significantly from spot commodity prices
- An investor may not get back the amount invested

About the Reference Index

The Bloomberg Commodity Ex-Agriculture and Livestock 20/30 Capped TR Index is a benchmark for non-agricultural commodities. It comprises futures contracts on 11 commodities, across energy, industrial metals and precious metals. Commodities are weighted by liquidity and global production, with caps on individual and group weightings to ensure diversification.

In order to maintain commodity exposure, the index rolls near-term futures contracts every month over a 5-day roll period. The index is rebalanced monthly.

More details are available at www.bloombergindices.com/bloomberg-commodity-index-family.

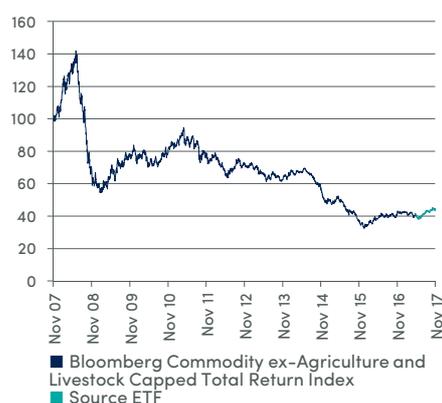

Source ETF structure

Source's market leading ETF structure allows efficient tracking of the Reference Index, while minimising counterparty risk. The Fund is fully invested in high quality securities, typically US Treasury Bills. It also enters into total return swaps to deliver the Reference Index performance. In addition, any positive performance above a set threshold is collateralised on a daily basis and swaps are reset weekly, thus minimising exposure to any counterparty. Investors should note that, whilst the structure seeks to reduce counterparty exposure, the Fund is exposed to a counterparty default.

Bloomberg Commodity Ex-Agriculture and Livestock 20/30 Capped TR Index

(Data as of 30 November 2017)

10 year performance

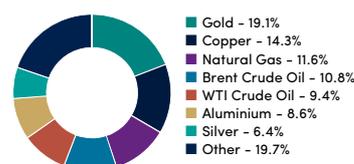

Risk/return profile

Year	Index performance	Volatility ¹	Sharpe ratio ²
2017 YTD	2.54%	11.78%	-

Source: Bloomberg

Past performance is not a reliable indicator of future returns. As this performance is of the Reference Index and not the Fund, it does not include any costs.

Benchmark composition

Top 10 index holdings

Company	Weighting
Gold	19.10%
Copper	14.31%
Natural Gas	11.57%

Key disclaimer information

Investors in Source products should note that the price of your investment may go down as well as up. As a result you may not get back the amount of capital you invest.

This factsheet which contains a summary description of the above mentioned ETF is for discussion purposes only and is intended for professional investors pursuant to Directive 2004/39/EC (MIFID) Annex II Section I. A complete description of the shares is set out in the prospectus of the above mentioned ETF. This factsheet is not for distribution to, or for the attention of, US or Canadian persons. The prospectus documenting the issue of Source ETFs is downloadable from www.sourceetf.com.

Without limitation, this factsheet does not constitute an offer or a recommendation to enter into any transaction. When making an investment decision, investors should rely solely on the final documentation and Offering Documents relating to the transaction and not this summary. Investment strategies involve numerous risks.

Investors should consult their own business, tax, legal and accounting advisors with respect to this proposed transaction and they should refrain from entering into a transaction with us unless they have fully understood the associated risks and have independently determined that the transaction is appropriate for them. In no way should either Source UK Services Limited ("Source") or Bloomberg Finance and its affiliates (collectively, "Bloomberg") be deemed to be holding itself out as a financial adviser or a fiduciary of the recipient hereof.

Neither Bloomberg nor UBS Securities LLC and its affiliates (collectively, "UBS") are affiliated with Source, and Bloomberg and UBS do not approve, endorse, review, or recommend the Source Bloomberg Commodity Ex-Agriculture UCITS ETF. Neither Bloomberg nor UBS guarantees the timeliness, accurateness, or completeness of any data or information relating to the Bloomberg Commodity ex-Agriculture and Livestock Index.

Risk factors: The investments of the Fund in the underlying indices and referenced commodities are subject to risks inherent in investing in such instruments.

The value of shares relating to each Fund can go down as well as up and an investor may not get back the amount invested. Changes in exchange rates between currencies or the conversion from one currency to another may also cause the value of the investments to diminish or increase. An investment in a Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. There is no assurance that the Fund will achieve its investment objective. As the Fund, whose target performance is linked to the Bloomberg Commodity ex-Agriculture and Livestock Index (the "Reference Index"), will often be invested in securities which differ from the constituents of the Reference Index, derivative techniques will be used to achieve the performance of such index. While the prudent use of such derivatives can be beneficial, derivatives also involve risks which, in certain cases, can be greater than the risks presented by investing directly in the constituents of the Reference Index.

Counterparty risk: Through the Fund, investors are exposed to counterparty risk resulting from the use of derivatives to provide exposure to the index. In line with UCITS guidelines and Source policies, the exposure to any derivative counterparty is tightly controlled but the default of a derivative counterparty may cause a loss to the Fund. It is recommended that potential investors study the Fund prospectus before investing.

Lack of track record: Neither the Fund nor the Reference Index have a material track record.

Risks related to commodity indices: The Fund is an index-linked fund and the amount payable in respect of the Fund depends upon, among other things, the performance of the Reference Index. Through its exposure to the commodity indices, the Reference Index is calculated by reference to the prices of certain commodity contracts and is therefore subject to many of the risks of direct investment in commodities. In addition to general economic and other factors, the commodity markets are subject to temporary distortions or other disruptions due to various factors, including changes in supply and demand, the lack of liquidity in those markets, speculation and government regulation and intervention, any of which may increase the risk of price volatility. Commodity futures markets are subject to regulations that limit the amount of fluctuation in prices that may occur during a single business day. Commodities are also subject to changes in regulation that may affect their price or liquidity, reduced liquidity of underlying contracts may affect the level of the Reference Index or require changes to

their components of methodology.

The Reference Index replicates an actual investment in futures contracts, where futures contracts that are nearing expiration are sold and longer-dated contracts are bought. This process is known as "rolling" and has an impact on the performance of the Reference Index. When the price of the futures contract in the first delivery month (which is sold) is greater than the price of the futures contract in the second delivery month (which is bought), the market for such contracts is referred to as being in "backwardation". A period of backwardation will have a positive impact on the performance of the Reference Index. When the price of the futures contract in the first delivery is lower than the price of the futures contract in the second delivery month, the market for such contracts is referred to as being in "contango". There have been periods of time when there has been consistent and/or significant contango, and the process of rolling futures has had a strongly negative impact on the performance of the Reference Index.

The representative and paying agent in Switzerland is BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland. The prospectus, the key investor information documents (KIIDs), the articles of incorporation as well as the annual and semi-annual reports may be obtained free of charge from the representative in Switzerland. Both the place of performance and the place of jurisdiction for shares in the sub-funds of the above umbrella funds offered or distributed in or from Switzerland shall be the seat of the Swiss representative. The prospectus, supplements and KIIDs for the Source ETFs are available at www.sourceETF.com. German investors may obtain the offering documents in paper or electronic form free of charge from the German information agent (Marcard, Stein & Co AG, Ballindamm 36, 20095 Hamburg, Germany).
